### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

### **IN THE CLAIMS**

Please cancel claims 8-49, 70, 71, 74, and 76 without prejudice or disclaimer.

Claim 80 is repeated twice, and listed in the claims as follow: ...78, 80, 79, 80, and 82.... Please cancel claim 80 between claims 78 and 79, and keep claim 80 between claims 79 and claim 81.

### ***Reasons for Allowance***

2. The following is an examiner's statement of reasons for allowance: the closet prior art of record (Liu, U.S. Patent No. 6,762,997) does not teach nor suggest the details of a method of creating a data path for a process executing on a server coupled to a storage area network (SAN), the SAN providing connectivity between the server and a storage device in the SAN, the method comprising:

parameterizing a set of attributes for a desired data path between the process and the storage device of the SAN, wherein the set of attributes includes: a detail about

Art Unit: 2143

at least one data volume; a performance setting; and a policy setting; and constructing the data path that provides said set of attributes, wherein said constructing step further comprises:

searching the SAN for a set of candidate storage devices;

identifying a candidate data path from the server to each candidate storage device of said set of candidate storage devices;

evaluating each said candidate data path against the set of attributes to rank said candidate data paths from a best candidate data path to a least best candidate data path according to the attributes, wherein the act of evaluating each said candidate data path against the set of attributes includes ranking all of the switch fabrics in the SAN; and

selecting said best candidate data path as the data path to be constructed by said constructing step.

So Applicant's arguments have been considered persuasive, in light of the claim limitations as well as the enabling portions of the specification.

3. The dependent claims further limit the independent claims and are considered allowable on the same basis as the independent claims as well as for the further limitations set forth.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
